

NIV
ZONDERVAN
STUDY BIBLE

Thousands of study tools for the
Zondervan Study Bible in

Featuring unique study notes and
features by Dr. D. A. Carson, along
with a team of over 60 scholars from a
wide range of evangelical
denominations.

About Olive Tree

Olive Tree Bible Software provides excellent Bible software and resources inspiring people to connect with God and the Bible via technology. Olive Tree offers thousands of resources across all major platforms. These resources include commentaries, dictionaries, and Bibles. For more information, go to <https://www.olivetree.com/press/>

“ Both Kevin and Kelly are phenomenally good. Thanks so much for letting us have them on our team. ”

Steven Cummings,
Vice President of
Operations, Olive Tree
Bible Software, Inc.

CASE STUDY

Challenge

Olive Tree Bible Software wanted to take their current Bible software and create a new app for the Zondervan Study Bible. The app needed to contain the full text of the New International Version (NIV) Bible and have several features including a searchable index, split screen to view Bible text and study notes together, and the ability to add notes and highlight text.

Olive Tree has a small in-house development team and needed more developers to complete their app within a tight schedule. Olive Tree elected to use Xamarin.Forms to build the app so that a single shared C# codebase could be used to create native UI for both Android and IOS. Olive Tree knew this approach would save time, but their team had little experience with Xamarin development.

Solution

Olive Tree chose IntelliTect to augment their team and assist with the creation of the iOS and Android apps specifically because IntelliTect has certified software engineers with Xamarin Mobile Development Certification and previous Xamarin experience.

IntelliTect's developers were quickly brought up to speed on the requirements and assisted through the release of the iOS app. IntelliTect continued through the final QA stages of the Android app release, at which point, IntelliTect was able to hand development over to Olive Tree to complete delivery and maintain the apps going forward.

Results

The IntelliTect and Olive Tree teams successfully built and released the apps on a fixed budget and released them on schedule.

The skills learned from the IntelliTect team allowed Olive Tree engineers to use the Xamarin.Forms framework that IntelliTect helped build to create the NIV Cultural Backgrounds Study Bible, and even better, Olive Tree is now positioned to use Xamarin in future app development.

IntelliTect

IntelliTect provides high-end architecture consulting, full life-cycle software development, and training that enables our clients to solve their most challenging problems. Our expert principal and senior engineers specialize in the latest technologies, including Cloud Computing (both [AWS](#) and [Azure](#)), Big Data, Machine Learning, and Artificial Intelligence (AI), [.NET Development](#), [Azure DevOps](#), [Office365/SharePoint](#), and Enterprise Application Integration. Skills and Services

Competent use of Xamarin.Forms
Xamarin Certified Mobile Developer
Ability to augment existing team seamlessly
Work within a short deadline

“ IntelliTect provided industry leading development services for Olive Tree on the Xamarin platform. Their level of professionalism and communication was the major contributing factor to us seeing the project through its phases and ultimately shipping the project on budget and on time. Should we ever need app development services in the future, IntelliTect will be our first choice. ”

David Trotz, Director of Software,
Olive Tree Bible Software, Inc.
