

Accelerate Reliable Releases with AI-Driven Automated Testing

Marionette automates complex UI and regression testing for Oracle Utilities and other enterprise systems. With new AI-powered scenario generation and automated test creation, teams can catch defects earlier, reduce manual effort, and release software with greater confidence.

MARIONETTE

Reduce Risk

- Catch regressions early with AI-accelerated, Shift-Left testing.
- Validate complex systems continuously to prevent costly defects.

Boost Engineering Productivity

- Automate repetitive testing so teams can focus on higher-value work.
- Scale coverage without increasing manual effort or complexity.

Strengthen Reliability

- Maintain stable, predictable release cycles across environments.
- Ensure critical workflows remain intact with clear, transparent results.

Core Features

AI Driven Scenario Discovery

- Convert BA prompts into executable test scenarios.
- Let AI navigate the UI to map each workflow step.
- Generate human-readable documentation automatically.

Automated Test Generation

- Create full test suites from discovered scenarios.
- Update page objects and reusable blocks automatically.
- Ensure tests follow consistent, maintainable patterns.

Execution & Reporting

- Run tests continuously across environments.
- Capture screenshots, videos, and structured logs.
- Triage failures quickly with clear, transparent results.

Test Data Acceleration

- Use TurboQuery to locate the right data instantly.
- Reduce setup time for complex test cases.
- Keep environments aligned with evolving scenarios.

Implementation Options

Equip Your Team (4-6 weeks)

Our testing experts train your team in Marionette's tooling, AI-assisted test creation, and automation best practices. Teams leave with a solid foundation and the ability to begin building reliable tests immediately.

Work With Your Team (2-6 months)

IntelliTect embeds alongside your engineers to co-develop automated tests, establish sustainable patterns, and integrate Marionette into your CI/CD workflows. This option accelerates adoption while building internal capability.

Be Your Team (Full Implementation)

IntelliTect manages the full testing effort using the complete Marionette suite. We create, execute, and maintain automated tests—on-site or remote—providing consistent coverage, transparent reporting, and measurable improvements in release reliability.
